Harrisons'

TRIPLE RED DELICIOUS APPLE

A Message from HARRISONS'

Our Friends:

Have you a copy of Harrisons' first catalog issued sixty-one years ago? It contained the best varieties of its time.

Yet, today it would be obsolete. This is primarily due to the advancement of the practical method of bud selection from trees of superior strains and extra heavy bearing habits originated by Harrisons, combined with other propagation improvements fostered by leading horticulturists, as well as Federal-State Experimental Stations.

Apples, Peaches, Plums, etc.—yes! The entire list shows marvelous progress. An infinite number of new varieties, many of them superior in strain, form, color and size, await the planter.

However, this abundance of new varieties has tended to confuse the problem of selection. The Harrison organization have assumed the responsibility of choosing the best, after careful scientific and practical tests, thus avoiding those varieties that lack merit, that would produce uncertain results, consequently protecting our customers. With this objective, the Harrisons' have discarded hundreds of varieties, both old and new, and have limited ourselves to cataloging only the best in every group, from the standpoint of performance and superiority.

HARRISONS' Fruit Trees and Small Fruits are TRUE TO NAME, earlier to bear, and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Ornamentals are of the finest types for their respective varieties.

We send you this catalog in the hope that you will take advantage of our high quality nursery stock which we are offering for 1945.

Appreciatively yours,

HARRISONS' NURSERIES,
Harrison Brothers, Props.
G. Hale Harrison, General Manager.

Bud-Selection
THE KEY TO
BETTER FRUITS

Cutting Buds

Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

Save Years of Waiting

Bud-Selection Plus Whole Root Propagation Gives
Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients in the soil to reach the tops and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method but results are what count. You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

Growing practices do make a difference.

Now is the Time to Plant

U. S. Government authorities are urging a large increase of Family Tree Plantings to take care of the alarming decline of fruit production.

Health authorities recommend eating twice as much vitamin-packed fruit. Many well known authorities predict that within a few years fruit production will be so low that only those who grow their own will have enough to supply their family requirements.

Make your planting this season. Use Harrisons' early-to-bear trees and plants.

Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 61 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until today Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-and-year-out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

Gardening for Victory

Throughout America, millions and millions of Americans are turning to the soil to produce fruit and food for their tables and to ornamentals for relaxation from mental strains and over work. Fruit is food. Grow your own, make preparations to can as much food as possible. Food will help win the war and write the peace.

We are trying to do our part by growing thousands and thousands of bushels of apples, peaches, soy beans, corn, etc., as well as fruit trees, small fruits, ornamentals, etc., that are capable of producing a lot of food and pleasure to thousands and thousands of people on the home front.

• 61 YEARS OF LEADERSHIP • OVER 4,000 ACRES •

This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious diseases and insects and to reach you in good condition.

Any time trees or plants are received that do not meet these standards they will be replaced free of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that dies from unavoidable causes at half price, if notified within two months after its arrival.

HARRISONS' NURSERIES.

JUMBO

Fruit Trees Big Roots—Bear Early

A
GUARANTEE
ON
JUMBO
TREES

NOW everyone can grow extra large rich colored, extra rich flavored, healthful, VITAMIN PACKED FRUIT in his own back yard

Time is money, therefore, for the additional expense of a few cents per tree you can plant Jumbo size fruit trees and eat the fruit from them surprisingly soon after planting. The Super-Size fruit trees, being especially grown as Jumbo trees, are the strongest growers. They are exceedingly vigorous, very hardy, and produce tremendous crops of fruit. These are ideal for the home garden.

Your Selection. Can be assorted varieties—apples, peaches, plums, and nectarines—consisting of only the varieties as listed on this page.

JUMBO SIZE—7 TO 8 FEET, HEAVILY BRANCHED

Harrisons'—The Nation's Fruit Tree Nurseries

Harrisons' APPLE TREES for the APPLE INDUSTRY

Apple Growing Pays Profits

BUT in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, the finest and by far the best quality produced on the North American Continent.

CROSS-COUNTRY PACKING

Our method of packing enables us to ship our products thousands of miles with the stock arriving in field-fresh condition. We guarantee safe arrival no matter where you live.

No one can measure in advance the future results of a newly planted orchard. A few years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty-one years of dependability and square business dealings finds Harrisons' today the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud selected" fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

True to Name

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

Plant "Bud-Selected" Super-Strain Trees

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

One of the Famous Harrisons' Apple Orchards in Bloom

HARRISONS' "BUD SELECTION" FROM SUPERIOR STRAIN TREES

Young fruit trees, budded from selected trees in full fruit, are definitely superior to any other method of propagation. Careful examination and selection of healthy, heavily branched, heavy-yielding trees are without question the best parent trees to supply the buds for young tree inheritance.

Harrison's fruit trees than any other.**

Harrison's Bud Selected Apple Trees Bear Fruit Quick

A NATIONAL SCARCITY OF FRUIT TREES

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1945 orchard plantings that there has been at any time during the past fifty years.

A recent national survey shows that fruit trees will even be scarcer during the next coming two years than now. Play safe—act quick—place your order now while trees are available.

EARLY RED DUCHESS. Highly colored early apples bring premium prices. This bud sport colors red all over early in the season.

STARR. Large, attractive with bright yellowish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey.

RED SUMMER RAMBO. Harrison's new early coloring bud sport. This new strain is much superior to the ordinary Summer Rambo.

WEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

GOOD FALL AND WINTER APPLES

BALDWIN. Large, red, yields big crops, good keeper. Winter.

CHERRY RED STAYMAN. Many growers, especially in certain districts, have some trouble getting enough color on their Stayman Winesap. We offer Cherry Red Stayman to those growers who want more and darker color. This strain is lighter in color than Dark Red Stayman, but darker in color than Scarlet Red Stayman, otherwise its characteristics are the same as ordinary Stayman in fruiting, etc.

DARK RED STAYMAN. The darkest of all our Stayman Winesap strains. It is especially recommended for growers who want the dark or almost black-colored apples. It is a heavy yielder, but we prefer any of the other strains that we offer to this one.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent shipper.

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp, sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollinator.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age.

NORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality above average.

OTHER SUMMER APPLES

STAYMAN WINESAP Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

TWENTY OUNCE. Very large, yellow striped with red; fine quality, good keeper.

WINESAP An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, aromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy, an unusually heavy bearer.

CRAB APPLES

Priced on Page 4

Double Purpose—An Ornamental and Fruit Tree Combined

HYSLOP. Deep crimson, large size, sub-acid and of good quality. Fine for all kinds of preserving, canning, etc., and good to eat fresh. Tree handsome.

TRANSCENDENT. Yellow striped with red; good for eating fresh and fine for preserving. Best of all crab apples. Tree large; quick grower.

YOUNG AMERICAN. Attractive red fruit of excellent size and quality. Good as ornamental.

and BEST RESULTS

SUPER RED McINTOSH—A Northern Favorite

BRIGHT RED JONATHAN

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan. Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

THE APPALACHIAN WINNER

RED YORKING

(U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Penna., for use in planting a large orchard about 40 years ago.

SCARLET RED STAYMAN—Tops with Many Growers

SUPER RED McINTOSH

An improvement on our already famous strain of McIntosh Red Color is brilliant solid red and commences to color weeks earlier.

SCARLET RED STAYMAN

BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard. Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

Hansen's Improved Bush Cherry

An Ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect.

1-yr. Bushes, Bearing Size,.....\$1.50 each

TRIPLE CERTIFICATION

By U. S. Government, State of Maryland, in addition to other horticultural inspection. Your order insures Harrison Grown, healthy, clean nursery stock. Free from diseases and insect pests. Certificate of Inspection accompanies each shipment.

HARRISON BROTHERS NURSERIES

BERLIN, MARYLAND

Over 4000 Acres

Founded 1884

RED VARIETIES

Flavored Apples

HOME OR COMMERCIAL ORCHARDS

RED SPY—Bears Crisp, Juicy Apples

SOLID RED WINESAP

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid red-colored Winesap, we recommend our new strain.

RED ROME BEAUTY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

McINTOSH RED

Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to any strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored apple grown. Recommended for home or commercial orchard plantings.

GET YOUR
ORCHARD STARTED
THIS YEAR

RED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

King of All Red Apples

TRIPLE RED DELICIOUS

Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

Glorified Red Apple of the World

Ideal for Home Orchards

Harrisons' Triple-Red Delicious is not only a commercial apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons' Triple-Red Delicious will give full value.

Right From the
Start with

LARGE TRANSPARENT (LODI)

A New Summer Variety

Ripens Very Early—Destined to Replace the
Ever Popular Yellow Transparent

We believe there is a big future for this new summer apple. Our commercial friends should lose no time in anticipating the demand for an apple of this type. Somewhat of a dwarf grower, bearing very young, it makes an excellent filler. The skin is a clear yellow, white-flesh, of medium size.

EARLY APPLE GROWERS MAKE MORE MONEY WITH LARGE TRANSPARENT

Yes, actual profits, that's what we mean. It can be done—here's why: Yellow Transparent apples are always first on the market and generally bring good profits when they attain proper size. Size on Yellow Transparent is hard to get, but easily on its Big Brother, "Large Transparent," which ripens at the same time.

**Large Transparent Apples Average Up to 1/2 Inch
Larger Than Yellow Transparent—This Means
75c to \$1.00 per Bushel Extra**

GRIMES GOLDEN

Harrisons' Selected "Big Yield" Strain
BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollinator known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

YELLOW DELICIOUS

It's Golden!

A golden yellow apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

DELICIOUS

SOMETIMES CALLED STARK DELICIOUS

This is the Original Strain of Delicious

Of peculiar and distinctive shape; brilliant dark red, flesh fine grained, juicy, crisp and melting, flavor sweet, with a slight acid taste, with a delightful aroma, very highest quality. Fall

Harrisons' Super- Selected Trees

with their unusual substantial root system, are
proving again and again that "bud selected"
strains spell yearly profits to orchardists and
commercial planters.

OTHER FAMOUS APPLES

EARLY MCINTOSH. Resembles its McIntosh parent in appearance, but is less aromatic. An attractive uniform red color, good size, flesh white, tender, and juicy. The trees are vigorous, hardy, healthy, productive, and long lived, if thinned early and severely. The shape of the tree especially the heavy-butted trunk, is like that of McIntosh. The crop ripens earlier than that of Yellow Transparent. The fine flavor is similar to that of famous McIntosh Red.

DOUBLE RED BALDWIN. A new tree for this old red variety. It bears red color much earlier than ordinary Baldwin, and makes it sell better. This new strain will be welcome to the grower of Baldwins. Late fall.

RED GRAVENSTEIN. This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit. Late summer.

CORTLAND. A new variety resulting from cross pollination of McIntosh Red and Ben Davis, and inheriting the good qualities of each parent. Beautiful red apple approximately the same size and fine flavor of the McIntosh, but ripens three weeks or a month later. Good keeper.

GALLIA BEAUTY. A Rome Beauty type of apple identical in every respect, except its earlier coloring qualities, recommended for commercial planting. Harrisons' have the genuine original strain of Gallia Beauty.

Peaches

A bright and PROFITABLE CASH FUTURE
Plant a PEACH ORCHARD
this Spring

The peach grower has a bright and profitable cash future—we advise you to plant a peach orchard this year, as the number of peach trees in bearing is the smallest of any time during the past fifty years.

THE REASONS BACK OF GROWING SUPERIOR STOCK

- A—Our organization has over 60 years experience.
- B—Every step in growing under the personal supervision of the Harrison Brothers.
- C—One hundred and fifty thousand trees in Harrison Brothers orchards from which our propagating trees are selected.
- D—Use of modern methods for planting, cultivating and digging.
- E—Over 4,000 acres of various types of soil.
- F—Ideal soil and climatic conditions.
- G—Co-operation with leading horticulturists and experimental stations all over the world.

Grown on the "Brink" of the Atlantic Real Hardy Grown Stock You Can Depend On

Our favorable climatic conditions, being located only 8 miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrison's to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit growing section of the United States.

Fruit Growers

Look at fruit trees in other nurseries, then come to Berlin and see the superior quality of Harrison's true-to-name varieties at attractive prices. See the fruit trees growing in the nurseries know what to buy. For best results, plant dependable Harrison-grown trees

TRUE TO NAME

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True-to-Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, Mass. These men are the world's foremost fruit identification specialists and they have pronounced our trees true to name.

For Mammoth Size Peach Trees, see page 14.

A National Scarcity of Fruit Trees

There is a drastic shortage of fruit trees throughout the nurseries of the United States; as a matter of fact, the smallest supply available for 1945 orchard plantings that there has been at any time during the past fifty years.

A recent national survey shows that fruit trees will even be scarcer during the next coming two years than now. Play safe—act quick—place your order now while trees are available.

HARRISON'S HARDY PEACH TREES

We absolutely guarantee Harrison-grown peach trees, variety for variety, to be as hardy or hardier than trees grown in any locality north of us.

Harrisons' Peaches

ARE A COLLECTION OF
THE WORLD'S BEST

JUNE ELBERTA PEACH—The Early Treat

CUMBERLAND. An outstanding favorite early white peach. A comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Carman.

Early Midseason Peaches

CHAMPION. A Good Home Peach. White, freestone, very large, creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside peach, it is one of the best. Tree is hardy, large grower and productive.

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for canning.

SOUTH HAVEN. Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

VALIANT. Early midseason. Seedling of Elberta. Yellow freestone, productive. A new Canadian variety.

A typical peach orchard, with a specimen tree, showing habit of growth, planted with Harrison grown trees from Berlin, Maryland.

VERY EARLY VARIETIES

JUNE ELBERTA. A big, handsome red and gold peach, highly colored, excellent quality and a dandy home peach, being a new variety. One of the earliest of the good yellow-fleshed peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

EARLY ROSE. Very early. Another favorite commercial peach. White, cling, medium large size for an early peach, high bright red skin, sweet, delicious flavor. Good shipping, making it a new favorite among commercial varieties.

GREENSBORO. White, freestone, extra large for such an early Peach. One of the handsomest, being a large, yellowish white with crimson cheek; flesh is white and of average quality. Exceedingly hardy, being an extra heavy, prolific bearer and adapted for wide variations in Peach regions.

EARLY HALE-HAVEN. A bud sport of the well-known Hale-Haven, retaining all its characteristics, such as large size, high red color before ripening, extra fine flavor, and yet ripening a week earlier. Tests show it will keep as good as the Hale-Haven. A very promising new commercial variety. We recommend every grower to plant a few trees so as to compare its merits with other varieties ripening at the same time. We are confident that you will like Early Hale-Haven and that it will be a profitable peach for you to grow. Plant Patent No. 325. **Ten cents per tree extra.**

YOUNGER BEARING

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from non-bearing scions. Harrison Grown Fruit Trees, due to the fact they are budded from bearing trees, will produce profit-paying crops in the earliest possible time.

GOLDEN JUBILEE PEACH—Yellow, Excellent Quality

**RED BIRD
PEACH—The
Best Very Early**

Leading EARLY PEACHES

Golden Jubilee

Eddy. The supreme early yellow
egg. Carman's earliest egg.
It is a light-colored egg, weighing
less than one pound. It is only slightly
tinted yellow, though it is attractive.
It is a long, thin, pointed egg,
about 7 inches long and 2 1/2 inches
wide. It is a good egg. The variety
is a sensation or record. The introduc-
tion of new varieties and is by
far better than any early variety of
commercial importance which has
been introduced in many years. It
ripens about four days ahead of
Carman.

Hale-Haven

Red Bird

Earliest of All Peaches

Earliest of All Peaches
Very early. White, cling, extra large with a bright red blush the first to ripen. Very juicy and the sweetest very early in the season. Supplied to tree nurseries in California during spring.

The Sensational REDHAVEN

Tops All Extra Early Peaches, Earliest Yellow Freestone Peach

The new early ripening yellow peach that ripens about 10 days before Golden Jubilee.

The most promising early ripening variety I have ever introduced. A cross between H-101 and Redhaven. Grown at South Haven, Michigan, Experimental Station. First year fruit 1 1/2 to 2 inches long, yellow background, smooth skin and flesh. Very sweet and juicy. Bears heavy crops and should do well in the West. Growers should try REDHAVEN. Supply limited.

Famous

MIDSEASON PEACHES

All Excellent for Home Orchards

1945

BELLE OF GEORGIA
Finest Flavored White Peach

ELBERTA
Original Strain
The Leading Peach

J. H. HALE—Giant
Size, Enticing Flavor

BELLE OF GEORGIA

Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and productive.

ELBERTA (Original Strain)

Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

Save Disappointment—Plant Only ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

Original Strain J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut, and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored peach. The original strain necessitates cross-pollination and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollination.

Extra Large Size Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior to Elberta.

Grown by Harrison Brothers, Berlin, Maryland

SALBERTA PEACH
Excellent Late Variety

Sullivan's EARLY ELBERTA

An Early Ripening Bud Sport of Elberta MIDSEASON YELLOW FREESTONE

Here is the early ripening strain of genuine Elberta growers have been wanting. Discovered by Mr. Sullivan in a Georgia orchard. Identical to genuine Elberta in every characteristic except it ripens about 7 days earlier. Yellow freestone, firm, juicy, rich, good flavored. Equally attractive as Elberta and is a good keeper. Good for either home or commercial planting.

Early Elberta

Early midseason. Yellow, freestone, large, lemon-yellow with a dark cast, blush with vivid red. Beautiful appearance, high quality, being somewhat similar to Elberta, although a trifle better flavor, rich golden tender flesh, yet firm and has a delightful flavor; excellent for canning.

Late Ripening Varieties

BRACKETT. Midseason late. The fruit is rich yellow with dark carmine cheek. Size is as large or larger than Elberta and much better flavored. Ripens 7 days later than Elberta.

LIZZIE. Late, distinct type of Elberta, very large, freestone, yellow, which ripens 24 to 26 days later than Elberta, having same prominent coloring characteristics as its parent.

SALBERTA. A Late Commercial Peach. Yellow, freestone, large, being a satisfactory cross between Elberta and Salwey. Salberta inherited the size, quality and productiveness of Elberta, and inherited the lateness in season of Salwey. This new variety is being planted commercially in many peach-growing sections. Ripens about 20 days later than Elberta.

SHIPPERS LATE RED. Midseason late. Large, round, yellow, freestone; very attractive. Ripens 3 days later than Elberta.

RIO-OZO-GEM. Late. See page 15 for description and prices Starts to ripen 14 days later than Elberta.

VERY LATE RIPENING VARIETIES

KRUMMEL'S (Krummel's Late October). Yellow, freestone; extra large, round, deep yellow with a blush of carmine on the sunny side—fine flavor. Good shipper, and ripens late in the season.

SALWEY. Very late. Yellow, freestone.

PROLIFIC BEARER—RIO-OSO-GEM PEACH

RIO-OSO-GEM

Ideal for Home Orchards

TWO WEEKS LATER THAN ELBERTA

The Rio-Oso-Gem would be a peach of commercial importance when ripening at any time during the peach season, but it is very fortunate that it ripens 2 weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable peach.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem peach trees.

Protected by U. S. Plant Patent No. 84

Exclusive Propagation and Sales Rights of the Rio-Oso-Gem in the Following States Granted to Harrisons':

Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Georgia, Kansas, Kentucky, Louisiana, Maryland, Maine, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and West Virginia. Also sales rights in Ohio, Indiana, Illinois, Missouri.

COMMERCIAL TESTED
America's Highest Price Peach
PLANT NOW! 1945

Rio Oso Gem—The Outstanding Profit Making
Peach—THE BEST PEACH

The World's Largest Peach

An amazing feature of the Rio-Oso-Gem is, it will take on a good bright red color and yellow background 2 weeks before ripening, and even 10 days before actual ripening time the percentage of bright red color is decidedly more than most other varieties. When Rio-Oso-Gem is ready to pick and ship it has practically a solid red color. There is no other peach known that carries such a high percentage of red color on the fruit as this marvelous Rio-Oso-Gem.

EXPERT FRUIT GROWERS SAY O. K.

Rio-Oso-Gem has now fruited in practically every peach district of the Union. Veteran peach growers of the nation are loud in their praise of this startling variety. Rio-Oso-Gem has passed the experimental stage and proven an outstanding commercial variety, superseding the famous Elberta of the Victorian era.

BIGGEST PEACH ON EARTH

The Rio-Oso-Gem is a perfect freestone, form is globular, slightly elongated, of extremely large size, averaging in diameter from 2 3/4 to 3 3/4 inches, deep yellow flesh, very fine grain, firm texture, with very excellent flavor, being rich, sweet and slightly spicy. The coloring is unique, being a beautiful dark crimson-red, running out to lighter crimson and into a rich mottle of crimson over the orange-yellow ground color. It is a good transcontinental shipper.

HARRISON'S BIG YIELD STRAWBERRY PLANTS

Grown at
Berlin,
Maryland,
Worcester
County

PICK WORLD'S FINEST BERRIES FROM YOUR OWN PLANTS A Big Profit from Your Own Back Yard

Everybody prefers the flavor of vine-ripened strawberries. They are more delicious and usually sell for 10c to 20c more per quart. Customers pay premium prices for garden fresh strawberries and small growers make real money, up to \$500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrison's "Big Yield" strawberries. Others are doing it, why not you? It costs only a few dollars to get started.

BLAKEMORE

The strawberry has become so popular it's called Blakemore, the most popular variety in all America. Returns several times before Premier and is equally dependable for producing big crops every year. The plant is healthy, and stands up well during drought. The berries are large, firm, an attractive red and acid quality. Fine for canning and preserving because it holds its color and shape so well.

Blakemore

Big Joe

DORSETT, Early

Large Fruit—Vigorous Grower—Heavy Crops

Dorsett berries average large size, considerably larger than the Premier; in fact, their size is comparative with Chesapeake, which is the outstanding late berry. Plant growth is exceedingly vigorous, being far more vigorous than most other varieties. Dorsett yields large crops of fancy, light red berries.

FAIRFAX, Early

The Sugar-Saving Berry

Color is a deep, full red; its rich, sweet flavor brings buyers back for more. Fairfax berries are exceptionally firm, making it an ideal shipper. Superior to all for home use, equal to any for commercial planting.

PREMIER King of the Early Berries

Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more strawberry growers than any other variety ever grown.

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big, bright red berries of fine flavor. For home garden, local market, or for shipping moderate distances it has outclassed all the other varieties.

Dorsett

Fairfax

See Page 17 for Prices

BIG JOE The Old Reliable Midseason Variety

LARGE YIELD—FANCY FRUIT—FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our big yield strain insures big crops.

CATSKILL Midseason

A midseason berry that will produce the largest crop of bigger berries of any midseason variety we know. Catskill is entirely satisfactory as to firmness, quality, color and attractiveness, season of ripening and climatic adaption. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking.

CHESAPEAKE The Favorite Late Berry

It is a good producer of very large berries that hold their shape well until the end of the season. It does not yield as many berries per acre as some of the early varieties, but the size and quality of its fruit enables it to sell for a much better price which offsets this disadvantage. The berries are firm enough to ship to distant markets and to arrive in first-class condition. An exceedingly valuable commercial berry but equally adapted for home planting. We offer a selected "Big Yield" strain.

HERE'S A NEW ONE Extra Good—Very Late

RED STAR

This is the other new one by the U.S.D.A., and a cross between the Chesapeake and Fairfax. This is the late one. Berries are large, and are borne on short stout stems that stay well under the leaves, thus protecting them from late frosts. Makes a good fruiting row and plenty of money can be made from growing this one as late berries always bring a high price.

Extra Good Fruits for the Home Garden

APRICOTS

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon-colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

NECTARINES ARE DELICIOUS

NECTARINES Delicious for Eating

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone.

SURE CROP. Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

NEW RED LAKE
CURRANTS

GOOSEBERRIES

RED JACKET. Big, roundish oblong berries with a mild, sweet flavor. Delicious for fancy desserts, salads, conserves, pies, etc. Bushes lovely as shrubs. Small yellow bloom.

DOWNING (GREEN). Large greenish yellow variety favored for shipping and canning. Highly flavored.

Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

CURRANTS

NEW RED LAKE. Biggest, sweetest, finest improved Red Currant on the market. Large bunches, produced in profusion. Extra hardy.

WILDER. One of the strongest growers and most productive. Bunch and berry large, bright, attractive red color. Large 1-yr. bushes, \$1.00 each; 3 for \$2.85; 6 for \$5.40; 10 for \$8.00.

Harvest Time.**

GEM EVERBEARING

New Companion for Mastodon

Get Your Berry Patch Started This Season

Bears 100 Days After Planting

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roadside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

EASY TO GROW

HARRISON'S Profitable Sour Cherries

Montmorency

The most popular sour cherry grown in America. It ripens midseason; is large, red, slightly acid, flesh very tender, good quality. The best shipper of all sour cherries; always commands the highest market prices in city markets or commercial canneries. When preserved at home or commercially, it is always attractive in appearance and of extra good quality.

EARLY RICHMOND. Exceedingly hardy and productive.

ENGLISH MORELLO. Large, blackish red cherry. Hardy and productive. Very late.

HARRISON GROWN CHERRY TREES

Budded from bearing commercial orchards of superior strains. All cherries are budded on hardy crown whole root seedlings, which, in our most favorable soil, form a large, fibrous, well-proportioned root system, which is exceedingly important for the proper growth of cherries. Highest quality at most attractive prices.

MONTMORENCY—The Best Sour Cherry, Easy to Grow

YELLOW SPANISH—

Sweet Cherry

BLACK TARTARIAN SWEET CHERRIES—Juicy, Rich Flavored

SWEET CHERRIES

What fruit is more pleasing than the sweet cherry? Try one out to plant in the back yard. We have a good supply of first class trees in the following varieties:

BING. Very large, dark brown, flesh firm with fine flavor.

BLACK TARTARIAN. Very large, sweet, juicy cherries. Excellent heavy bearer and most profitable sweet cherry. Midseason.

GOLDEN WAX. Large, yellow, fine flavor. Bear abundantly. Early, now Midseason.

GOVERNOR WOOD. Large, light yellow cherries with fine flavor.

LAMBERT. Extra large sweet, dark cherries. Now in market.

NAPOLEON (Royal Anne). Large, dark cherries with excellent flavor, prolific bearer. Now in market.

SENECA. Resembles Black Tartarian, but fruit twice as large and has sweet flavor.

SCHMIDT (Schmidt's Bigarreau). Large, sweet, deep black, tender, fine flavor. Midseason.

WINDSOR. Large sweet cherries—dark, juicy, delicious. Now in market.

YELLOW SPANISH. Large, sweet, yellow with fine flavor. One of the most beautiful and popular of the light colored cherries. Heavy bearer. Midseason.

HANSEN'S IMPROVED

Bush Cherry

An ornamental shrub producing delicious fruit. Very easy to grow, highly productive and hardy. The fruit is large, black and sweet, wonderful to eat right from the bush. Introduced by Dr. Hansen of the South Dakota Experimental Station. Leaves are silvery green, turning to red in autumn. Attractive white blossoms add to landscape effect. 3-yr. Bushes, Bearing Size, \$1.50 each.

HARRISON'S AMERICA'S BEST Famous PLUMS VARIETIES

ABUNDANCE. Early, large, color pinkish red changing to darker red, with thin bloom. Yellow flesh. Very juicy, sweet and tender, pleasantly aromatic. Hardy, very productive. Adaptable to a wide diversity of soils and climates.

BRADSHAW. Midseason, large, dark violet-red, juicy, excellent flavor. Desirable for canning.

BURBANK. Early, about one week after Abundance. Large, cherry-red with thin lilac bloom. Flesh amber-yellow with rich, sugary flavor; high quality and very productive. A product of Burbank, the master plant breeder. Should be in every orchard.

FELLENBERG PRUNE. (Italian.) Late, medium size, freestone, dark purple, delicious. Fine for drying.

GRAND DUKE. Late. Commercial variety, purplish black, juicy, sweet, excellent for cooking.

GERMAN PRUNE. Late, large, dark purple, sweet. Good for canning and drying.

LOMBARD. Midseason. Medium size, showy, purplish red fruit, excellent quality for canning, cooking, preserving or spicing. Prolific cropper.

RED JUNE. Early, medium size, garnet-red color, thin bloom, flesh light yellow, somewhat meaty, sweet, aromatic. Trees are healthy, hardy and productive. An early market plum.

SANTA ROSA. Early. Fruit very large size, round, purplish red, flesh reddish near skin, firm, juicy, and has a pleasant tart flavor, of exceptionally high quality.

SHIRO (Early Gold). Early. Fruit is very large, golden yellow, semi-transparent, covered with bright scarlet-red blush.

SHROPSHIRE DAMSON. Late, medium size, dark purple. Very productive. The best for preserving. The popular old-fashioned Damson variety.

STANLEY PRUNE. Midseason. Freestone, large, new prune variety, outstanding characteristics. Considered best for cooking and fresh fruits.

YELLOW EGG. Late. Large, golden yellow. Good for cooking. Largest and handsomest of yellow plums.

WICKSON. Midseason. Extra large size, color dark red, thin bloom, flesh amber-yellow, firm, sweet.

Fancy BARTLETT PEARS

ALWAYS TOP

- 1—Superb Quality
- 2—Heavy Cropper
- 3—For Home or Commercial Grower
- 4—For Eating and Canning
- 5—Bear Early
- 6—A Harrison Brothers Specialty

For home, for canning, for market, the best. Ripens during summer.

A golden colored pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest pears that grows, to eat raw. A mingling of the flavor of Bartlett pear and quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sorts. The trees do especially well with high culture.

BARTLETT PEAR
So Full of Juice
You Can Eat
Them With
a Spoon

Fancy Bartletts Bring Highest Prices

Bartlett pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack apples. Pears are sometimes packed in peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

KIEFFER

SURE CROPPER—EASY TO GROW

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer and Koonce are the only Pears that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular canning pear.

BEURRE BOSC. Large size, fine quality, brings highest market price. Late

BEURRE D'ANJOU. Large, green in color, somewhat yellow when ripe, buttery, melting, rich vinous, good flavor. Tree vigorous, hardy, prolific bearer. Very late.

CLAPP'S FAVORITE. Large size, hardy and very productive. Thrives where other varieties fail. Very early.

DOUGLAS. Very resistant to blight. A winter pear of wonderful quality, golden yellow with a faint blush on the cheek. Bears early.

DUCHESS. Very large, dull greenish yellow. Tree somewhat dwarf but a dependable bearer. Late.

GORHAM. Flavor is sweet and vinous with a very marked and pleasing aroma. Flesh is white, tender, buttery and juicy. Valuable for dessert and canning. New.

KOONCE. One of the earliest pears, free from blight, does not rot at the core like many early pears. Fruit is yellow, medium to large, delightful flavor. Very productive. Extra good for Southern states.

SECKEL. A beautiful and delicious little pear. One of the richest and highest flavored pears grown. Tree dwarf, bears prolific crops. Late.

WORDEN SECKEL. A seedling of Seckel. Superior in size and color. Mid-season.

OUTSTANDING IN VALUE

For many years we have grown and developed a few of these extra fine trees for our customers who preferred to pay a little more money rather than wait several years for the smaller trees to develop in their own gardens.

MAMMOTH SIZE BEARING-AGE APPLE TREE
Five-Year-Old Budded Nursery Grown

Extra!

MAMMOTH BEARING SIZE APPLE TREES 1945

FIVE-YEAR-OLD BUDED NURSERY GROWN

Every home owner should plant several of these for fruit and shade, too. These selected trees have already borne apples in our nurseries. Not little "whips", but a developed creation that is full bodied and beautifully branched, of colossal size. Trees you will be proud to own and show your neighbors.

Extra strong rooted specimens—all cared for in our own big nurseries. You get the zenith of perfection—all "Big Fellows"—a picture of health and grandeur. A Harrison Product—offered in limited quantities.

THE VICTORY GARDENER'S DREAM

Plant this spring—under proper care, you may pick and eat apples next summer and fall from your own trees.

LATHAM
RASPBERRIES

Grown

by

Harrison Brothers
Berlin, Maryland

LATHAM

Biggest Money-Making Raspberry in America

A Blue Ribbon Winner for the Home and Commercial Grower. It Simply Cannot Be Equalled.

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have seen it in trial are praising the many unusual features that have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every way; you will be both delighted and surprised after seeing it in trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower, the canes are extra heavy, well able to support the load of fruit. The foliage is healthy, dark green, lustrous and leathery, highly resistant to insects. Lathers berries with Cuthbert. Covers a longer fruiting season than others. Berries are beauties and will cause a sensation at the market. Many are over an inch in diameter. They hold this size to the end of the season.

OTHER RED RASPBERRIES

CHIEF. A new red raspberry that is designed to grow on the average farm. Cuthbert, originally from the New York State, Brooklyn, Fruits are large, good for eating fresh or when well ripened can be easily shipped. Excellent keeper, shipper, and excellent keeper, bearing fruit well with little trouble to market.

ST. REGIS. There is a demand for this fine fruit in the late summer and fall. Growers make exceptionally large profits when grown for markets. However if you do not grow them for market, by all means plant a few bushes for home use. St. Regis produces a big crop of fruit during the regular season and then continues bearing all summer and fall on the new canes.

NEW—the Sensational Boysenberry

The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches in Length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 3 for \$1.35; 6 for \$2.40; 12 for \$3.50; 25 for \$5.50; 50 for \$9.50; 100 for \$16.50; 250 for \$35.00.

NEW LOGAN

A new black raspberry variety; probably its two most noteworthy characteristics are that it ripens about a week earlier and is more resistant to the virus diseases. A very productive variety and fruit of good size and quality. If an early berry is desired, it is one of the best. It does not crumble.

HARRISONS'
BEAR BETTER CROPS
OF BETTER FRUIT.

*For Bigger and Better Crops Plant
CONCORD Harrisons' Super Strain*

Blue, midseason. The most popular and extensively planted grape in America. It adapts itself to varying conditions and is grown in most every state in the union. Large, compact bunches of dark purplish black colored berries. The berries are covered with a rich bloom, skin is tender, but is sufficiently firm to carry to distant markets; flesh is juicy, sweet and tender.

Exceptionally Heavy Yields

Concord is a very vigorous grower, hardy and very productive. It ripens during midseason, and is rated as the best money-making commercial variety.

AGAWAM. Red. Midseason. Large, thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord.

CACO. Red. Midseason. Fruit is very large and handsome. A rich wine-red color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich vinous flavor. Quality good. A very desirable variety.

DELAWARE. Red. Early midseason. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Requires rich soil, good culture, close pruning.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully 10 days before Moore's Early.

BIG YIELD GRAPE VINES

Harrison Brothers Grow at Berlin, Maryland,
The Grape Vines We Sell

NIAGARA. White. Midseason. Best of the standard light-colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

WORDEN. Blue. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vineyard.

NEW GIANT Cultivated Blueberries

- Profitable to Grow
- Delicious Berries
- Very Ornamental

Once Planted Lasts a Lifetime

Blueberries are not only the largest money makers of all fruits commercially, but are also one of the easiest fruits to grow. The berries bring up to 75c per quart—\$400.00 per acre in the third year. They are exquisitely mild, sweet and juicy and bring highest prices on the market. The demand for blueberries is practically unlimited. A planting lasts a lifetime with proper care and the plants will pay for themselves from their first crop. A few bushes planted in the shrub border and in the garden will be sufficient to supply you with berries for years.

BLUEBERRIES—Ornamental as Well as Fruiful Jumbo Size—Bear First Year Planted

Blueberries—Easy to Grow

Set the bushes 5 by 7 feet apart in moist, acid soil. If your soil is sweet, it may be made acid by mixing with it a little quantity of acid peat, rotted leaves and pine needles, or similar material. Fruit ripens over a period of several weeks. Plant two or more varieties so as to insure proper pollination.

Very Ornamental

As an ornamental shrub the blueberry cannot be surpassed. Full of lovely pink blooms, which open to be deeply, white flowers in June. Plants are compact, low growing, having waxy green leaves which turn red during the fall. Twigs are reddish brown and very showy during the winter.

SPECIAL JUMBO SIZE BLUEBERRY PLANTS

Have already fruited in the nursery. Ready to bear big crops of luscious berries on your own grounds and are as easily grown as a shrub or rose bush. You can pick delicious berries the first season planted, and each year they will produce a larger crop with very little attention. We only have a few hundred of these Jumbo sized plants to offer. Can supply in the following varieties only: Cabot, Rancocas, Concord, Rubel, and Jersey.

Prices: Jumbo size, 4-year-old, 2 to 3 ft., \$3.75 each; 3 for \$10.50; 10 for \$32.50.

1945 PRICES OF ALL BLUEBERRIES					100
	3 to 9 Plants Each	10 to 29 Plants Each	30 to 99 Plants Each	or more Plants Each	
2-yr., 4 to 12 inches ..	\$1.40	\$1.15	\$1.00	\$0.85	\$0.75

3-yr., 18 to 24 inches ..	2.75	2.35	2.00	1.75	1.50

FIVE LEADING BLUEBERRIES

Listed in Order of Ripening

CABOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries are a delicate bluish purple.

RANCOCAS. The bush is slender and upright, reaching a height of five feet. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and bear earlier than Cabot.

CONCORD. The bush is of upright habit and often starts below six feet in height. The young growth is light red over olive. The berries are large and firm, ripening later than Cabot and Rancocas. They are excellent for jam and jelly.

RUBEL. A very tall, upright variety. We have seen them as tall as ten feet in height. The dark berries ripen the latest of all the varieties, about the first week in July.

JERSEY. The bush is very tall and slender. The winter twigs of the young growth are light red over olive. The berries are the largest of any blueberry, ripening about the same time as Rubel.

ASPARAGUS

*It's Easy
with*

Harrisons' "Big Yield Strain"

MARY WASHINGTON

Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

The Famous True-to-Name Mary Washington Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U. S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

HARRISONS' ORNAMENTAL

NORTHERN STRAIN

“CHINESE” ELM

Grows 20 Feet in Four Years

Because of its beauty and extremely rapid growth, Chinese Elm has become a leading shade tree of America. It is planted in every state, and like its native country of Korea withstands intense cold and extreme heat. It makes excellent shade in five short years, averaging about 5 feet growth annually. It is by far the fastest growing hard-wood shade tree. It resembles the American Elm except the leaves are smaller, with the gracefulness of a Cut-Leaf Birch.

AMERICAN ELM

(*Ulmus americana*). A noble native tree of great size, wide spreading, gracefully curving branches, growing up in a form like the outline of long-stemmed flowers in a tall vase.

AMERICAN PLANE

(*Platanus occidentalis*). A very rapid growing tree for yard and street planting. The bark is grayish green and peels off during the winter.

SILVER MAPLE

(*Acer dasycarpum*). The name comes from the color of leaves. Underneath, these are the same shade as new, bright silver; on top they are light green. Many of them are carried on their edges, and when wind blows the trees are alive with silver and green flashes. In the fall the leaves fade to pale yellow. Growth is faster than that of any other Maple.

ORIENTAL PLANE

(*Platanus orientalis*). A rapid, upright, clean growing shade tree, long lived, beautiful dense foliage. A superb tree of gigantic proportions, which is very hardy.

ORIENTAL PLANE

Stately Pin Oaks

Quercus palustris

America's Favorite Oak Tree

The tree of trees—no other tree is more beautiful—once planted the pin oak continues to grow for a lifetime. Some of the finest, most attractive plantings depend almost entirely on the stately pin oak for their landscape appeal.

Beautiful Bronze Color During Autumn

Deeply cut, bright, fresh green foliage during the summer, turning to a bright bronze color during autumn. The most graceful tree for the lawn, equally as desirable for street or roadside planting.

YOU'LL NEVER REGRET PLANTING PIN OAKS.

RED OAK (*Quercus rubra*). Growth is slow, eventually grows large. Has extra large leaves. A good shade and street tree.

LOMBARDY POPLAR
Tall and Stately

LOMBARDY POPLAR

(*Populus nigra italicica*)

A tall, spirelike tree used for screens and formal plantings. It is fast growing, distinctly ornamental and beautiful.

Each	2 for	10 for	100 for
4 to 5 feet	\$0.75	\$1.10	\$ 4.50

The above prices are for Lombardy Poplars only.

PIN OAK
For Permanence and Dignity

NORWAY MAPLE

(*Acer platanoides*)

Typical maple leaves, large and bright green, fading to gold in the fall. Trunk and branches are sturdy and strong, lending an effect of ruggedness. Growth is slow. Branches and foliage are thick and compact, and the head is round-topped.

SWEET GUM

(*Liquidambar styraciflua*)

A shapely tree with slender, corky-ridged branches. Leaves are bright green and lustrous; in autumn they change to a pleasing tone of crimson color.

NORWAY MAPLE
One of the Best

AMERICAN PERSIMMON

Small trees highly ornamental and producing an abundance of pleasingly astringent spicy fruits, highly prized when gathered after the frosts. 2 to 3 feet, \$2.00 each.

Plant Paper Shell PECAN TREES for Shade and Nuts

PAPER SHELL PECAN

Medium to large nuts; oblong thin shell; rich flavor. Good grower. The best type pecan grown. 2 to 3 ft., \$3.00 each. 3 to 4 ft., \$4.00 each.

BLACK WALNUT

(*Juglans nigra*)

Rapid grower, spreading branches, large, delicious nuts, prolific bearer. 2 to 3 ft., \$2.00 each.

AMERICAN FILBERT (Hazel Nut)

PECANS—Abundant Nuts in Winter

HARRISON'S
HI-QUALITY
TREES

AMERICAN FILBERT (Hazel Nut)

The old family favorite. Small, attractive bush, yielding abundant crops of tasty round nuts. Bears very young. 1 1/2 to 2 feet, \$2.50 each.

TAMARIX—Feathery Foliage

GOLDEN BELL (Forsythia)
Spring is Here

Harrisons'

FLAMEBUSH

Chaeonemeles Japonica Rubra Grandiflora

This remarkable grafted shrub comes into bloom in the spring. Dazzling double red flowers followed by transparent orange-red fruits. Max. 3 ft. green foliage. An ideal specimen plant to furnish early coloring in any planting. Prices: Grafted plants, field grown, 1½ to 2 ft., \$2.50.

LILACS

ROYAL BLUE HYDRANGEA

HYDRANGEA

Hydrangea Otaksa

A native of Northern hydrangea. When winters are severe, it must be heeled in. Large balls of blue flowers, very attractive large leaves. Color depends on acidity of soil. Field grown plants, \$1.50 each; 2 for \$2.80.

ALMOND, Double Pink Flowering

SPIREA BILLIARDI

DEUTZIA, Pride of Rochester

ALTHEA, Rose of Sharon—Fast Growing

Lifetime Shrubs To Beautify Your Home

Everywhere people are making their homes more livable, more attractive. A little planning, a little planting. And what joy and satisfaction in having a home framed with beautiful trees and a well-kept lawn planted to shrubs and flowers.

ALTHEA or ROSE OF SHARON (*Hibiscus syriacus*). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butterfly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

DEUTZIA, PRIDE OF ROCHESTER. Double white flowers, slightly tinged with rose, appear in mid-June.

DOGWOOD, RED-BRANCHED (*Cornus alba sibirica*). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (*Forsythia*). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

HONEYSUCKLE BUSH (*Lonicera morrowi*). Early white flowers in June, followed by red berries.

SPIRAEA BILLIARDI. A hardy type of spirea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (*Philadelphus coronarius*). Of upright habit, and produces in June a wealth of white, fragrant flowers.

SWEET-SCENTED SHRUB (*Calycanthus floridus*). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

TAMARIX, AFRICAN (*Tamarix africana*). Feathery gray-green foliage, very showy.

TARTARIAN HONEYSUCKLE (*Lonicera tatarica*). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

WEIGELA, PINK (*Weigela rosea*). The most popular weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

FIRETHORN—Orange Berries All Winter

PLANT DURING 1945

CREPE MYRTLE (*Lagerstroemia indica*). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. **1 1/2 to 2 ft., each \$1.50.**

FIRETHORN. A beautiful shrub covered with a profusion of white flowers in early spring, followed by bright orange berries which hang on all winter. **1 1/2 to 2 ft., \$2.50 each.**

HYDRANGEA PEE GEE (*Hydrangea paniculata grandiflora*). Large flowers; first snowy white, then pink changing to reddish bronze in the fall. Blooms midsummer to fall. **18 to 24 inches, 90¢ each.**

QUINCE, FLOWERING (*Cydonia japonica*). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. **1 to 1 1/2 feet, \$1.00 each.**

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. **15 to 18 inches, \$1.00 each.**

WEIGELA EVA RATHKE. Very attractive deep carmine-red flowers, making a very showy shrub. **1 1/2 to 2 feet, \$1.00 each. 2 to 3 feet, \$1.25 each.**

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. **2 to 3 feet, \$1.25 each.**

NANDINA DOMESTICA. Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long panicles followed by masses of small, bright red berries which are retained all winter. **12 to 18 inches, \$1.50 each.**

TARTARIAN HONEYSUCKLE

The Glorious Spirea Van Houttei

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen, in groups, in border planting, and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

PLANT NOW—
1945

Berckmann's Golden Arbor-Vitae

Biota aurea nana

Small compact evergreen. Foliage a bright golden yellow. Fine for adding color to the planting. Highly admired by all who see it.

12 to 15 inches . . . Each \$2.40 2 for \$4.40

BERCKMANN'S GOLDEN ARBOR-VITAE

SPINY GREEK JUNIPER

IRISH JUNIPER

SPREADING YEW
FOR OTHER EVERGREENS
See page 32

Spreading Yew

Toxus cuspidata

The beautiful view of moderate bushy growth, spreading at the top, which does tall, starts branching from the bottom and continues to the top. The spreading branches are densely clothed with dark green foliage. It is the most attractive spreading evergreen we have ever offered. Excellent Hardiest of all yews. By trimming this shrub to the size you want it can be made to grow semi-upright and likewise trained so that the shrub can be made to develop lower to the ground. Can easily be trimmed into any shape

12 to 15 inches . . .	Each \$2.00	2 for \$3.80
15 to 18 inches . . .	Each 2.40	2 for 4.40
18 to 24 inches . . .	Each 3.30	2 for 6.00

Spiny Greek Juniper

Upright columnar habit and bluish green foliage. The growth is so slow that the tree is well adapted for foundation plantings and other situations requiring dwarf trees.

12 to 15 inches . . .	Each \$2.00	2 for \$3.80
15 to 18 inches . . .	Each 2.50	2 for 4.70

The Charming Irish Juniper

(*Juniperus communis hibernica*)

Forms a narrow and dense column, compact, bluish green foliage. Most attractive when placed on end foundations of a home, at corners and entrances. A delicate addition to any garden.

1½ to 2 feet . . .	Each \$2.00	2 for \$3.80
2 to 3 feet . . .	Each 2.50	2 for 4.70
3 to 4 feet . . .	Each 3.25	2 for 5.80

Pyramidal Arbor-Vitae

(*Thuja occidentalis pyramidalis*)

A really beautiful evergreen that should be included in every planting. It grows tall and narrow, requires no trimming and retains its bright green color throughout the whole year. A pair of them placed at the different ends of the corner of a home makes a superb showing. Our pyramidal arbor-vitae are grown with extreme care and each one is a specimen.

1½ to 2 feet . . .	Each \$2.25	2 for \$4.00
2 to 3 feet . . .	Each 2.75	2 for 5.00
3 to 4 feet . . .	Each 3.50	2 for 6.20

Compact Globular Arbor-Vitae

(*Thuja occidentalis compacta*)

Natural compact, globe-shape, dark green foliage. The ideal low-growing plant for masking against the taller evergreens in foundation plantings.

12 to 15 inches . . . Each \$1.75 2 for \$3.00

Do Not Confuse Harrison's Hi-Quality Evergreens with Bed-Grown Stock. This Type of Stock May be as Tall as the Plants We Offer, They Do Not Have the Body and Are Useless for Immediate Landscape Effect and Oftentimes Require Several Years Growth Before They are Satisfactory.

Your Cooperation Please - THANKS

Dear Friend:—

Due to war conditions and the drastic paper shortage, we are not issuing as many catalogs as usual. Some of your friends may want to plant Victory Fruit Gordens and we know they would appreciate you loaning them this book, (after you have sent in your own order) so they too can plant a Victory Fruit Garden.

We will appreciate this favor and so will your friends and neighbors.

Sincerely yours,

HARRISON BROTHERS

	Each	4 to 5 feet	5 to 6 feet
3 to 4 feet	\$1.50	1.75	2.00

"The Rare FRANKLINIA"

(*Franklinia Altamaha*)

Beautiful blooms and blazing fall foliage bring beauty to any planting. Flowers start opening in mid-August and continue to open until hard frosts. The flower buds appear like small balls covered with whitish green satin; when as large as marbles they unfold; the guard petals emerge, satiny snow-white, elaborately frilled and pleated. The snowy frilly chalice, 3 inches in diameter and of piquant irregularity, holds a sumptuous mass of the rich orange golden stamens having a delicate balmy fragrance. The young leaves unfold a charming, delicate, bronze red; at maturity they are 5 to 6 inches long by about one-third as wide, a rich dark green with red veining. In autumn the whole tree blazes a rich warm color. Produces a beautiful effect in any planting. 2 to 3 ft., \$3.50 each.

**MAGNOLIA SOULANGEANA
NIGRA**

Small tree or bush with large, 9-petal dark pink flowers before the leaves in the spring. One of the most beautiful flowering plants. Price: 1½ to 2 feet, \$4.00 each.

**BECHTEL'S FLOWERING
CRAB APPLE**

Only genuine double-flowered crab. When in bloom, appears to be covered with delicate pink, perfectly double, small roses of delicious fragrance. Best flowering crab apple.

	Each
1½ to 2 feet	\$1.00
2 to 3 feet	1.50
3 to 4 feet	2.00

A TYPICAL FOUNDATION PLANTING

BEAUTIFUL RETINOSPORAS

Dainty and Feathery—So Picturesque in the Foundation or Rockery

PLUME-LIKE RETINOPORA (*Retinopora plumosa*). A handsome evergreen with feathery, light green foliage, more beautiful than a fern. Excellent for foundation plantings; can be kept pruned to any desired height.

VEITCH'S SILVER RETINOPORA (*Retinopora squarrosa veitchii*). Foliage silvery blue feathery and dense, giving a soft, woolly appearance. Broad pyramidal outline, can be kept to any height by trimming. One of the best retinoporas.

GOLDEN PLUME-LIKE RETINOPORA
Our Most Popular Golden Tinted Evergreen

A handsome golden colored evergreen that is admired by all. Its pleasing shade provides the right amount of contrast when it is planted along with other evergreens along its side or back of it. Feathery, fernlike foliage can be kept trimmed to any size. No home foundation plantings are complete without this remarkable healthy evergreen.

HICKS' YEW

HICKS' YEW (*Taxus cuspidata Hicksii*). An evergreen tree that is very similar to the true Yew, but is much smaller. The branches are horizontal, spreading, and the leaves are narrow with sharp, pointed tips. Very hardy, disease-resistant, and long-lived. A tall evergreen tree, reaching heights of 20 to 30 feet, but may be trained to a smaller size. Very attractive and extremely showy when in flower. Grows well in sun or shade, and can even stand salt spray.

HANDSOME IRISH YEW

IRISH-YEW *taxus baccata Hibernica*

Fine Soft Lustrous Foliage

An ARISTOCRAT from OLD IRELAND

This evergreen is the aristocratic member of the yew family. It grows tall and narrow with stout, crowded branches and spirally arranged leaves which are dark green in color. This yew is very scarce, but everyone who sees it is enthusiastic about it. Formerly it was imported from Europe, but after all importations were discontinued by the Federal Government, American nurserymen were unable to supply their customers. Fortunately, we had some specimen plants in our nurseries from which we were able to propagate.

GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red in late fall, a protection against small animals, because of the sharp thorns. This type of hedge is practical and inexpensive.

UPRIGHT BARBERRY

(*Berberis thunbergii hibernica*)

THE IDEAL HEDGE PLANT

Very similar to green barberry, except it grows upright instead of spreading; glossy green foliage, pyramidal habit, bears a profusion of scarlet berries which stay on the bush well into the winter months. May be trimmed any desired shape. Hardy, can be used for hedges or individual specimens without pruning.

American BOXWOOD

GROWN BY HARRISON BROTHERS
BERLIN, MARYLAND

—the real Aristocrat of the Evergreen family
YOU CAN SECURE THE FINEST SPECIMENS IN AMERICA FROM
HARRISONS'

Possibly no evergreen shrub has been so much used for marking the boundaries of formal gardens, to outline flower beds, for low hedges, and for other ornamental purposes. The plants will adapt themselves to almost any situation and climate, and by judicious pruning can be trained to many forms.

Compact—Deep Glossy Leaves

Our Boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English Boxwood. This variety is a dwarf grower, but it makes much faster growth than the English Boxwood. For those who want large Boxwood plants in a few years, this is the best variety to plant.

EVERBLOOMING HYBRID TEAS

Ami Quinard Very dark crimson-maroon, semi-double flowers. One of the darkest roses grown and under certain conditions appear to be black. Very free bloomer, healthy grower. The most spectacular dark rose.

Condesa de Sastago Marvelously colored rose of coppery red inside and rich yellow outside. A profuse bloomer at all times, keeps well when cut, and is spicy fragrant. Compares with the Radiance rose in vigor and hardiness.

Etoile de Hollande At present considered most popular of crimson hybrid teas. Velvety scarlet-crimson with delicious fragrance, and enormous petals. It charms continuously with its delightful color, vigorous growth, and well-formed flowers on long stems. Truly a faultless rose.

Golden Dawn Generally considered the finest yellow rose. Blooms of soft lemon-yellow tinted with old rose markings, long-lasting fragrance of real tea scent. Hardy, bushy, medium height, and very vigorous.

Kaiserin Auguste Viktoria Perfect creamy white bloom, slightly tinged with lemon, large and full. Long shapely buds open to full-petaled, deliciously scented bloom. An old favorite that even today has not been surpassed.

YOU CAN PLACE YOUR ORDER WITH US WITH COMPLETE CONFIDENCE. It is our earnest desire that each and every one of our customers be fully satisfied in their dealings with us. If you are not and feel that it is our fault in any way, please write to us. No transaction is complete unless you are completely satisfied.

Terms—Net Cash

Remittance with order, by check, money order or draft. We will ship C. O. D. provided a deposit of one-fourth amount of purchase price is sent with order. All nursery stock priced f. o. b. Berlin, Maryland.

Mrs. Chas. Bell A delicate, refined shell-pink shade, intensely fragrant. Very vigorous, tall and bushy. A sport of the ever-popular Pink Radiance, and sometimes called "Shell-Pink Radiance." An exquisite rose that should be in every garden.

Mrs. E. P. Thom Deep yellow buds, with carmine markings, opening to semi-double, clear lemon-yellow, never fading blooms. Similar to Souv. de Claudius Pernet, being among the best yellows, grown successfully throughout the United States.

Mrs. Pierre S. du Pont Medium sized reddish gold buds open to a semi-double golden yellow that is a glorious sight from early summer until freezing weather. Moderately fragrant. Vigorous, compact, glossy foliage. The "ace" of the golden yellow roses.

Pink Radiance A brilliant carmine-pink with yellow light silvery tone on the inside, and deeper on the outside. Vigorous, free bloomer, parent of Red Radiance. Among the oldest roses, planted everywhere because it has made good everywhere.

Pres. Herbert Hoover One of the outstanding roses. A glorious new rose of vivid cerise-red toned with yellow, orange and scarlet, richly perfumed and free flowering.

Red Radiance A sport of the famous Radiance except color. A brilliant cerise-red color, and intensely fragrant. Tall and bushy, healthy foliage and excellent blooming qualities. The favorite red rose of America's millions.

Talisman A multi-colored glorious combination of orange, yellow and rose-red. They simply eclipse other roses in autumn. Fine for both decoration and cutting. The triple-tone flowers are produced all season.

Paul's Scarlet Climber

Large, intense scarlet blooms; freely produced. It is strong and perfectly hardy. The most popular climbing rose. Same price as other varieties of roses.

Money Back

In the event that any nursery stock sold by us should prove untrue to name under which it is sold, we hereby agree, on proper proof of such untruthfulness to name, to replace the original order or to refund the purchase price. Except for such liability, and in respect to all nursery stock sold by us, we give no warranty, express or implied, as to description, quality, productiveness or any other matter. HARRISONS' NURSERIES, Harrison Brothers, Props., Berlin, Maryland.

Note: Any money overpaid by customer will be promptly refunded.
